A NEW STANDARD IN STEEL SECURITY DOORS

Securexit is a UK-based manufacturer dedicated to delivering made-to-measure steel hinged doors for commercial and industrial projects. We understand the high stakes of your work - project delays, unreliable products, and non-compliance are simply not an option.

That's why we've built Securexit from the ground up to be your trusted 'one-stop shop' partner, guaranteeing high-quality, certified products and a truly seamless process from initial design to final technical support.

OUR MISSION

To provide the most reliable, secure, and durable steel door solutions for the commercial and industrial sectors, underpinned by a commitment to sustainability and exceptional value.

BUILT ON 25+ YEARS OF INDUSTRY LEADERSHIP

Trust starts with a proven track record. Securexit is led by founder, David Lycett, whose name is synonymous with quality and success in the industry.

David brings over 25 years of specialist experience in the steel door manufacturing sector, including his successful tenure with Robust UK Ltd. This history is your assurance that every Securexit door is designed, manufactured, and supported with deep, practical knowledge that only decades in the field can provide.

"I've spent over 25 years understanding the steel door industry. We use that knowledge to engineer solutions that solve your project challenges, not just supply a product.

Every door we make is backed by our full technical support team and delivered at a genuinely accessible price point."

- David Lycett, Founder of Securexit

THE SECUREXIT ADVANTAGE

We are committed to producing and delivering steel doors that meet the highest industry standards.

We continually validate our manufacturing, energy-use and after-sales processes through accredited third-party agencies to ensure compliance, sustainability, durability and safety, giving our clients full confidence in product performance across sectors.

Our products undergo rigorous testing and carry certifications including CE marking to 14351-1 and third-party certified to PAS24 security rating or LPS 1175 SR2.

Our experienced team works to ISO14001 environmental compliance standards.

We source our raw materials from the best suppliers, hand selecting the appropriate parts to develop the most reliable external steel doors.

We are focused on sourcing eco-friendly materials, allowing us to consider sustainability at each stage of our product lifecycle. Our materials, coupled with our advanced manufacturing techniques ensure our external steel doors are durable and reliable.

WARRANTY

We are so confident in the performance of our external steel doors that we offer a fantastic warranty. Our straightforward warranty is a practical guarantee that covers repair or replacement.

C3 Corrosion

We offer a 12-year warranty on C3 environments, or all areas not classified as C4 or C5.

C4 Corrosion

We offer a 5-year warranty on all C4 environments, covering coastal towns or islands from 250m-2000m.

C5 Corrosion

We offer a 3-year warranty on C5 environments, covering marine within 300m of the sea.

Finish

We offer a 7-year warranty on the adhesion and UV stability of your polyester powder coated finish.

DOORS BUILT FOR YOUR **INDUSTRY**

Securexit is positioned to support a range of industries, some of these include:

Industrial and Warehousing

Transport

Healthcare

Education

Retail and Leisure

Modular Buildings

Temporary Structures

Office

Commercial

STEELSHIELD

Our core Steelshield range offers a variety of reliable, made-to-measure doors, from general-purpose utility access to high-security and critical fire-rated applications.

Product Name	Purpose & Key Features	Security & Fire Rating
Steelshield	Our most popular and versatile utility door. Engineered for superior durability and longevity in commercial and industrial settings.	Standard commercial/industrial durability. No specific security testing.
Steelshield 1	The enhanced security version of our standard door. Built with the same durability but includes design modifications and robust locking systems to achieve a certified security standard.	Security tested. Meets a recognised security rating.
Steelshield 2	Our maximum security solution. Recommended for high-risk or critical infrastructure sites.	High security tested. Meets a higher recognised security rating.

Product Name

Purpose & Key Features

Security & Fire Rating

Steelshield FR

Engineered to maintain integrity and insulation during a fire.

Fire rated to FR 60 / FR 120. Also available as security tested.

Steelshield FL

Designed specifically for areas requiring significant airflow and to prevent unwanted access and debris.

Security focused ventilation. Engineered to achieve a high degree of security appropriate for a fully louvered design.

All of our products can be specified using our technical datasheets, available on our website.

As well as our standard options, we offer custom design of all of our steel doors upon request.

Click the button to read our Steelshield datasheets.

ACCESSORIES

To accompany our high-quality steel door range, we offer a variety of door accessories for your unique specification and security requirements. These include:

Locks, Cylinders and Padlocks

Our locks, cylinders and padlocks are certified to British and European standards, enabling you to select the right locking system for your door project.

Door Controls

Whether you need close proximity door controls or network based door controls, we offer a suitable door control option for your security specifications.

Door Furniture

From fire-rated door signs and finger plates to stainless steel pull handles, our selection of furniture enables you to add the finishing touches to your steel door project.

Door Seals

We have a choice of door seals to help protect against all weathers, draught, fire, smoke as well as noise.

Hinges

Our hinges ensure higher security for any door set. As standard we use lift hinges Certified to BS EN 1935 grade 14 rated to 160kg maximum weight of the door leaf.

Electronic Lock Solutions

We offer a range of electronic lock solutions which are compatible with security and fire rated external doors.

Emergency Exit and Panic Hardware

Our range of emergency exit and panic hardware allows for swift exits in case of emergency or panic whilst ensuring security from external access.

Find all the information on accessories you require for your next project in our Technical Documents on our website. Click the button to see our Technical Documents.

EXPERT SUPPORT AND SEAMLESS SPECIFICATION

We understand that specifying steel doors for commercial and industrial projects can be complex. Our commitment is to provide a seamless process from initial design consultation through to project completion. This is the core of our “one-stop shop” service.

Design Consultation

We work with you to clearly define the performance requirements (security, fire rating, ventilation, size, etc.) for every opening, ensuring the door is perfectly matched to its application.

Expertly Written Documentation

To support your planning and installation teams, we provide immediate access to necessary technical documentation.

CAD Drawings

For seamless integration into your architectural plans.

PDF Datasheets

With detailed specifications, clearances, and installation guides.

Our aim is to eliminate project delays and the stress of sourcing bespoke solutions by providing responsive, reliable technical support and guaranteed performance documentation.

OUR SUPPLIERS

The reliability of a Securexit door begins with the quality of its components.

We partner with a select range of reputable, industry-leading suppliers to ensure that every lock, hinge, and piece sheet of steel meets our exacting standards for durability and performance.

Our key partners include:

ASSA ABLOY

HOPPE® 

JSJ Precision Engineering
Specialist in Precision Sheet Metal Fabrication

uptonsteel

By collaborating with the best in the business, we guarantee that our products are built using superior materials that will stand the test of time.

PRODUCT DEVELOPMENT

Testing, quality control, and certification are key drivers for our product development. We are committed to a process of continuous improvement, ensuring we meet all the latest industry standards and exceed them where possible.

The Testing Process

Every product in our range goes through a rigorous testing process before it proceeds to manufacturing. This ensures the durability and reliability of your door from day one. Our testing includes...

Security Testing

We thoroughly test against recognised security standards, such as PAS24 or LPS 1175, to confirm resistance to forced entry.

Weather Testing

Doors are subjected to challenging weather simulations to guarantee performance and integrity in areas with extreme weather

Fire Testing

For our Steelshield FR range, we conduct fire testing to ensure the doors maintain their integrity and insulation for specified periods.

We dedicate the necessary time to our product development process to ensure our security doors will perform reliably, particularly in high-security or exposed areas.
