

STEEL SHIELD EXTERNAL DOOR STANDARD LOUVER PANEL OPTIONS

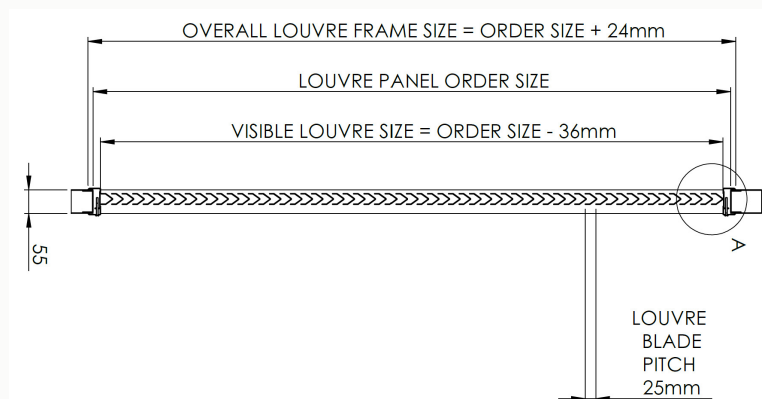

The Louvre panels have been designed to fit into the Steelshield External door.

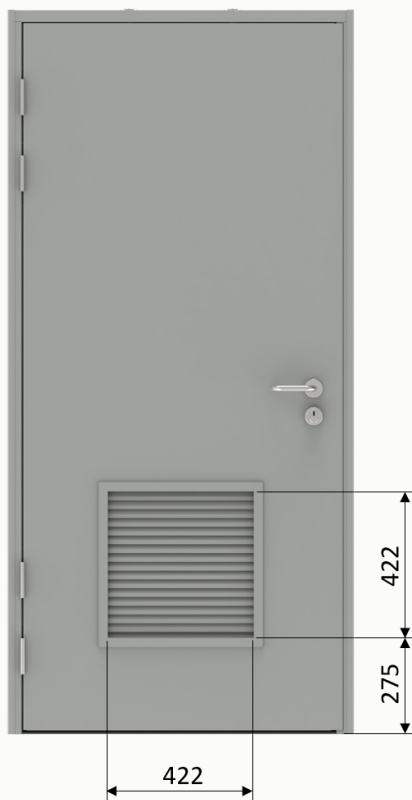

They are a two part frame system manufactured from 1.2mm steel outer frame with welded corners. The Louvre blades are manufactured from 0.75mm stainless steel.. The two part Louvre is clamped around the door leaf by means of screws applied from the internal face.. The fixing are visible from the internal face but they are powdercoated to match the door.

The louvres come in 4 standard options and sizes as shown below.

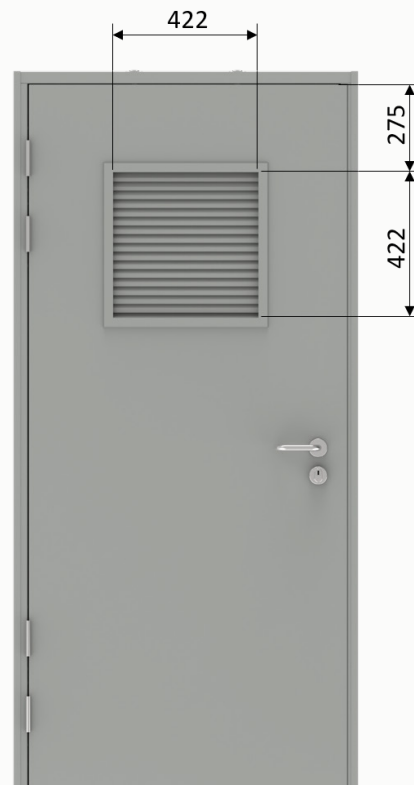

Other sizes are available and are made to your specific size requirements.

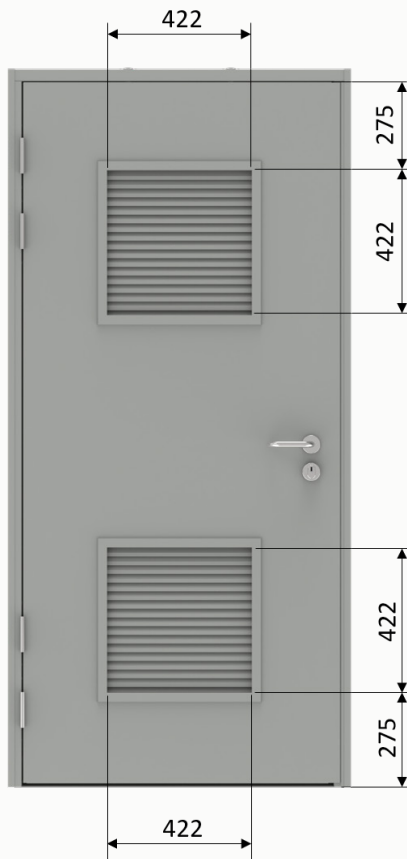

457 x 457 Lower

457 x 457 Upper

457 x 457 Upper & Lower

457 x 1524
